# TRAVEL SAFE

KEEPING PEOPLE SAFE AND INFORMED THROUGHOUT THE WORLD

## INTELLIGENCE PROTECTION INVESTIGATION

The Inkerman Group is a leading international business risk and intelligence company, working throughout the world to identify and deal with the risks, threats and vulnerabilities facing private individuals and businesses today.

## OVERVIEW

The Inkerman Group provides the full range of travel security services throughout the world

- Global Tracking Services
- Travel Intelligence Services
- Automated integration with Travel booking agents
- 24/7 Operations Call-Centre Support
- Real-time Event Monitoring and Reporting throughout the World
- Country and Travel Information
- In-depth Country Reports
- Political Risk Reports
- Travel Advice
- Kidnap and Ransom Services
- Close Protection

## TRACKA

Corporate duty of care and the requirement to be able to manage and locate staff, particularly those working remotely/the lone worker and/or in specific risk/sensitive areas throughout the world, is increasingly important to businesses. As is the requirement to ensure that all business travellers (and their families) are well-informed and equipped to deal with any set of travel issues they may face. The Inkerman Group has a series of travel safe services to ensure that all business and private travellers (including gap years) can be tracked.

### EASY TO USE

Tracka uses existing mobile devices - any GPS enabled Blackberry, or Windows mobile 5 or 6 Smartphone with GPS capability with easy to download software, all of which can be done remotely and with help from our Tracka team.

### 24/7 COVER, 365 DAYS A YEAR

Managed by The Inkerman Group and supported by its Operations Centre 24/7, monitored and tracked in real-time with qualified teams ready to give advice and respond to any emergency.

### FLEXIBLE FOR WHAT YOU NEED

Whether for business or private usage, the system reflects your specific needs and can be adapted to deliver the level of cover you need throughout the world.

### Important features of the system include:

- Dealing with emergencies, giving advice, monitoring 24/7
- Live location of devices on the system
- Geo fencing - allows geographical areas to be "fenced" to give additional safety features - if those being tracked leave the designated area, it alerts the system, mapping and locating the individuals in real-time
- Mapping - Street level mapping is available for all platforms
- Accurate to 3-10 metres (dependent on satellite coverage)
- Speed and direction of travel
- Can be used by all business travellers, staff and their families, private individuals and students on gap years
- Regular checks on devices – ensure that device is always active (battery low / fault reports).

THE INKERMAN GROUP

# TRAVEL SAFE

KEEPING PEOPLE SAFE AND INFORMED THROUGHOUT THE WORLD

## TRAVEL SAFE

The Inkerman Group's Travel Safe internet based service delivers real-time information and risk assessment throughout the world; a comprehensive service of all travel, risk and business information – accurate, up-to-date and in one place, for companies, organisations and their personnel to be able to access the very latest information at the touch of a button, any time of the day or night.

Individual travellers can access the system and can also be sent updated information via SMS, email or phone – so even when travelling, business travellers can be constantly updated on the latest developments in-country.

When used in conjunction with Tracka, travellers can be alerted when in an area of immediate threat. A seamless travel advice service linked directly to the travel booking system and which triggers an alert response dependent on the level of risk in the region.

## DETAILED RISK REPORTS

- Country Briefs

These reports contain essential information for any organisation choosing to send its employees overseas. This includes assessments of the risk posed to travellers associated with terrorism, kidnap and crime. There is also information regarding the political situation in the country, the situation with regard to the operation of the security forces and travel restrictions, alongside more general local intelligence. Similar reports can also be produced for specific cities.

- Political Risk Reports

These are more comprehensive reports tailored towards businesses wishing to commence operations in unknown or suspect environments. They include detailed information on political and economic risks in the country or region – security, corruption, regulation and the general climate for the operation of foreign organisations in the country.

*The Inkerman Group monitors and analyses political, security and financial developments across the globe. Global perspective, critical information, daily updates.*
